

GENEVA MOTOR SHOW 2015

KAHN DESIGN ANNOUNCES WORLD PREMIERE OF THE CHELSEA TRUCK COMPANY 105 LONGNOSE DEFENDER CONCEPT

Kahn Design has announced the release of a new coachbuilt Land Rover Defender model under its Chelsea Truck Company brand: the 105 Longnose Concept which will premiere at the 2015 Geneva Motor Show on stand 6338, Hall 6 at 14:45, March 3rd.

The 105 Longnose is based on the Land Rover Defender 90, and features a 400mm extension to the bonnet, giving an overall wheelbase of 105 inches. The exterior of the vehicle features a number of enhancements including a square sectioned wide arch body kit, a redesigned X-Lander front grille and front bumper.

The vehicle on display at Geneva features an engine upgrade to the 6.2-litre GM LS3, as well as an 6-speed gearbox, with upgraded braking and suspension systems. Other potential engine options for the concept would be the V8 Ford Coyote and V8 Ford XS.

“The Defender is recognised and treasured across the world. There is obviously nothing else like it” said Afzal Kahn, Creative Director and CEO of the Kahn Group.

“Land Rover may be putting the long-serving Defender into retirement, but we have big plans for the iconic off-roader. The 105 Longnose is set to make a very big impression, whilst staying true to the pioneering ethos of the Defender.”

The 105 Longnose Concept maintains the iconic look of the classic Defender, but the extended bonnet hints at the increased power within. A number of option packs have been suggested to further extend the Longnose concept, including safari, expedition and deep water fording packs, as well as armoured options.

The aesthetic may be classic, but the technology is very much 21st century, with the option to add a heads up display, climate control system, satellite navigation, parking sensors and cameras and a driver night vision system, amongst other enhancements.
