## ADVENTURE EDITION

---

The Defender has helped to establish Land Rover's credentials as the expedition vehicle of choice and the Adventure Edition is designed for customers who want to explore.

To enhance the Defender's already impressive off-road credentials, the Adventure Edition features distinctive new underbody protection for the side sills and engine sump, while Goodyear MT/R tyres promise to make the most of whatever grip is on offer.

The Adventure Edition comes in a choice of three striking metallic colour options, which include Corris Grey, Yulong White and Phoenix Orange. All feature contrasting Santorini Black paint for the Adventure grille and its surround, the bonnet, roof and rear door, plus the headlamp surrounds and wheel arches. The Adventure Edition can be fitted with a roof rack, raised air intake and rear ladder as optional accessories.

Seven-inch LED projector headlamps, clear front indicators and Gloss Black split-spoke diamond-turned alloy wheels also distinguish this expedition-inspired model. The front wings feature 90 and 110 decals.

The focus is firmly on comfort inside, where the Adventure Edition provides high quality shelter from the elements.

Premium seats with Windsor Leather upholstery (available in four different colourways), perforated leather inserts and contrast stitching all add a touch of luxury. They are complemented by the leather-trimmed steering wheel, gear knob and handbrake lever, plus the Bright Aluminium interior trim.

High quality Windsor Leather also features on the passenger facia and instrument panel while leather trim on the doors and grab handles, Ebony headlining and bespoke carpet mats complete the look.

Adventure Edition models will be available on a limited production run in 90 Hard Top, 90 Station Wagon, 110 Utility Wagon and 110 Station Wagon bodystyles.
