## PRESS RELEASE

March 2015

### GARIA MANSORY Prism

The fastest and lightest GARIA ever made.

The creative collaboration between MANSORY and GARIA reaches new heights with this year's exhibited model at the Geneva Auto Show 2015. The GARIA MANSORY Prism is the fastest golf cart the duo has made to date with a top speed of 60 km/h (37 mph) and an acceleration of 0-40 km/h (25mph) in less than 2 seconds thanks to new Samsung Lithium Batteries and an upgraded Curtis Controller. The speed is further assisted by a significant weight loss compared to a regular GARIA Monaco Roadster of more than 150 kg, making this also the lightest GARIA ever made.

Still suitable for golf due to its adjustable speed and regeneration settings via the machined aluminum knobs on the dashboard, the driver can opt for one of the three driving programs: "Golf" "Street" or "Race" - the last one powerful enough to spin its wheels on dry tarmac and lending the car a go-cart attitude in terms of handling and performance. This really is the ultimate golf car!

Made as a visualization of the customization program GARIA offers its clients, the GARIA MANSORY Prism debuts chrome body panels and aluminum switches made in collaboration with German Bugatti supplier Kussmaul. Clear coated carbon fiber parts and leather seats come from MANSORY who offers a full official range of upgrades for all GARIA models.

Most of the parts on the GARIA MANSORY Prism is available as upgrades for all regular GARIA cars, but the GARIA MANSORY Prism and its unique

# ≡ MANSORY ≡

performance and adjustable settings is strictly limited to 7 pieces.

The GARIA MANSORY Prism is street legal in Europe and can be registered with license plates and driven on the road.

GARIA Golf Car MSRP: 14.699€

GARIA MANSORY Prism MSRP: 75.000€

GARIA is available from more than 100 GARIA dealers around the world as well as through most MANSORY dealers. For more info go to [www.garia.com](http://www.garia.com) or [www.mansory.com](http://www.mansory.com)

Follow GARIA on twitter: @gariagolfcar

GARIA is a Danish privately owned company founded in 2005 with the sole purpose of building the ultimate luxury golf carts. Available in golf versions as well as EU and U.S. street legal versions with 2 and 4 seats plus a roadster variant the GARIA can be custom made to suit your every need via the GARIA MANSORY Accessory program and a wide range of options.

**About MANSORY Design & Holding GmbH:**

British high-class vehicles, and their particular flair, have always been the passion of the company's namesake and founder, Kourosh Mansory. This enthusiasm resulted in him spending several years in England and also led to a personal commitment to automotive values such as tradition, hand crafting and sophisticated technology. So right from the founding of the company in 1989, special attention was paid to the brands Rolls-Royce, Bentley, Aston Martin and Ferrari. In the middle of 2001, the company moved from Munich to the Fichtelgebirge area: At its new headquarters in the town of Brand, not far from the Wagnerian city of Bayreuth, the experienced team develops and produces high end tuning in all disciplines of vehicle building and has established itself as a qualified supplier to several vehicle makers.

Manufacturing at the highest technical level, combined with outstanding workmanship and the finest materials represent the quality standard of the MANSORY company. The basis of the MANSORY technology programme consists of harmoniously designed aerodynamic programmes, ultra light aluminium wheel rims and powerful increases in engine power output, while high quality accessories and stylish interior equipment supplement the product range. Whether distinctively sporty, or extravagant and high-end, the MANSORY engineers ensure a feeling of comfort and authority.

MANSORY now has a team of more than 200 employees and can fulfil nearly every automotive desire of its exclusive clientele. The company does that in Germany and worldwide through its selected distribution partners.
