

BUILD VISION AND INSPIRATION

Drawing on a lifetime of car-customization experience, 2015 NASCAR Xfinity Series Rookie of the Year Daniel Suarez teamed with the Motorsports Technical Center to bring his vision for the ultimate street-friendly yet track-ready Camry to life. Suarez wanted something elegant yet sporty to bring out the best in the XSE's performance.

The color scheme features a pearl-white body with contrasting black roof and A-pillars, along with strategically placed carbon-fiber components to keep weight down. The front splitter and rear wing were custom-designed to work in tandem and produce usable downforce at highway (or racetrack) speeds.

The hood features custom aluminum ductwork designed with Suarez's input.

The interior features custom leather upholstery with the driver's signature stitched in red, as well as various trim pieces fashioned from carbon fiber.

CONCEPT: Motorsports Technical Center & Daniel Suarez

MECHANIC/FABRICATORS: Marty Schwerter, Rich Garver, Brad Vetter, Chuck Wade

BODYWORK: George Lowe, Misfit Industries

PAINTER: George Lowe, Misfit Industries

ENGINE: 3.5L V6
